### 🎓 Education

#### Full Stack Web Development

Masai School (Full Time)

Apr 2022 – Dec 2022

#### BSC-IT

Mumbai University

Jun 2017 – Dec 2020

#### HSC

Maharashtra State Board

Jun 2015 – Apr 2017

### 🧠 Skills

React JS • React Native • HTML • CSS • Javascript • MongoDB • NodeJS • ExpressJS • AWS Serverless • AWS S3 • Selenium • Vitest • Jest • Playwright

### 🧩 Soft Skills

Team Management • Decision Making • Adaptability • Open-Mindedness

### 📁 Professional Experience

#### 86 Agency

Software Development Engineer

May 2023 – present | Gurugram

- Worked as a full-stack web developer in a fast-paced startup environment.
- Developed and maintained web applications using a combination of front-end and back-end technologies.
- Conducted thorough testing and debugging to identify and fix software defects.
- Assisted in deploying applications to production environments and provided ongoing support.

### 📁 Projects

#### Bonify Style Kit

A ReactJS UI Library for Dynamic Components

**Tech Stack:** React, Tailwind CSS, Vitest, Playwright, Storybook

##### Features:

- Built dynamic, reusable React components using ShadCN and Tailwind CSS.
- Configured Storybook and documented component usage.
- Provided test coverage through Vitest snapshot testing and Playwright.

##### Responsibilities:

- Developed and documented multiple reusable components with props for customization.
- Written test cases and snapshots for components.
- Configured and maintained Storybook for interactive component demos.

#### Contract Wallet

Fintech feature solution for bonify

**Tech Stack:** React, Node.js, Vitest, Java, Selenium

##### Features:

- Manage user expense contracts, including five types: Mobile Bills, Loans, Electricity, Insurance, and Credit Card.
- Add, edit, delete, and update contracts.
- Track and maintain expense contracts using user-provided data.

##### Responsibilities:

- Developed frontend screens using a custom UI library.
- Implemented backend routes for contract management features.
- Conducted frontend testing using Vitest.
- Automated testing with Java.

#### LogyXPS

eCommerce Shipping Service in India (Logistic Aggregator)

**Tech Stack:** Node.js, Express, MongoDB, React, Redux, Bootstrap, Material UI

##### Features:

- Auto-import orders from Shopify or add them manually and select courier partners.
- Admin dashboard to manage orders and track delivery status.
- User profile and channel integration management (Shopify, WooCommerce).
- Integration with various courier partners across India.

##### Responsibilities:

- Designed and implemented the backend using Node.js, Express, and MongoDB.
- Integrated APIs for courier partners like Delhivery and Ecom Express.
- Developed Shopify sales channel integration for auto-importing orders.
- Created RESTful APIs for user, admin, and order management.
- Built frontend pages such as User Profile, Add Order, Dashboard, and Sidebar using React, Redux, Bootstrap, and Material UI.
